Dear Ms. Vega,

I have recently reviewed the Expanded Site Inspection draft report prepared by Black & Veatch for the Avenue O and 118th Street (ILD981194087) site. I have no comments regarding the recommendation. However, in the report it isn't clear which soil samples contained Level I concentrations. This information would be very beneficial to know for planning future sampling events and also for Illinois Department of Health review of data.

Thank you for the opportunity to review and comment on this report.

Sincerely,
